--	--

Professional Summary

Software Engineer with over three years of experience designing, developing, deploying, and maintaining web and desktop applications for enterprise and institutional projects. Experienced throughout the entire software development lifecycle (SDLC), from requirements analysis and system design to deployment and production support. Skilled in building scalable, secure, and maintainable applications using Java, Spring Boot, Angular, and modern DevOps practices. Passionate about delivering high-quality software, solving complex technical challenges, and continuously improving engineering processes.

TECHNICAL SKILLS	
Scripting language	Python
Programming language	Java – JavaScript – Html5 - Angular – CSS3 – ReactJs – PHP - TypeScript
Databases	MySQL – PostgreSQL – SqlLite - SQL
DEVOPS tools	GitHub - jenkins – docker – Git -Gitlab
Test tools	Cucumber - Selenium - Appium - JMeter
Software Architecture	MVC, REST architecture, microservices
Desktop applications	Electron.js, Offline-first applications with data synchronization
Backend development	RESTful API, Spring security, JWT auth , Microservice
Operating Systems	Windows - Linux
AI & Modern Development Tools	GitHub Copilot - ChatGPT - Cursor (if you use it) - Prompt Engineering - AI-assisted software development
Infrastructure	AWS , GCP , Hostinger

*

Professional Experience		
Year	Enterprise	Position
February 2023 – Present	Synapsys (Permanent contract)	SOFTWARE ENGINEER
Key Responsibilities : Designed and developed an employee audit management system covering organizational structure, reporting hierarchy, employee management, and managerial workflows, integrated with an Android application for user authentication.		

Participated in deployment to the testing environment. Technologies: Spring Boot, Angular, Android. - Developed an enterprise access control management application. Technologies: PHP, Angular. - Designed and developed an enrollment management platform integrated with SYLAB, including user management, organizational structures, enrollment configuration, interoperability features, and desktop/mobile support. Technologies: Spring Boot, Angular, MySQL. - Developed a materials ordering management system integrated with SYLAB for automatic entity creation and synchronization. Participated in application deployment within a Linux testing environment using Jenkins and Docker. Technologies: Laravel, PostgreSQL, Jenkins, Docker, Linux. - Developed a tourist tax collection management system using JHipster. Technologies: Spring Boot, Angular, PostgreSQL. - Performed corrective maintenance on Senegal's Universal Health Coverage (SEN-CSU) platform used for managing insured citizens and healthcare organizations. Technologies: Spring Boot, Angular, MySQL. - Developed an offline desktop application for SEN-CSU with secure synchronization between offline and online databases. Technologies: Electron.js, SQLite.		
September 2022 – January 2023	B&G Digital (Permanent contract)	Front-End Developer Software Engineer
Key Responsibilities : - Developed automated test algorithms and generate a QA test report - Built front-end features for a tourism management platform covering hotels, restaurants, attractions, and events. - Performed manual testing and performance testing.		
Mar 2022 - Aug 2022	B&G Digital (Internship)	Software Test Engineer Devops
Key Responsibilities : - Developed automated testing scripts and generated QA reports. - Designed and implemented CI/CD pipelines integrating automated testing. - Automated software delivery workflows using Jenkins.		

Academic & Personal Projects	
Designed and developed a complete SaaS solution for restaurants including a customer storefront, administrative dashboard, and mobile application.	Highlights Full-stack development using Spring Boot and React. Secure REST API with Spring Security and JWT authentication. Role-based access control and permission management. Multi-channel inventory management. Financial reporting (sales, expenses, net profit). Promotional campaigns and coupon management. Cloud deployment using Render, Vercel, and PostgreSQL. Environment configuration, CORS management, and production troubleshooting. Architecture designed for deployment across multiple restaurant businesses. Integration with mobile payment providers including Wave and Orange Money.
Personal Project – Multi-Warehouse Management Platform (SmartWarehouse)	Designed a digital platform composed of a web application, mobile application, and integrated marketplace.

	Features include: - Real-time warehouse monitoring - Inventory management - Sales and invoicing - Logistics tracking - AI-powered demand forecasting - Inventory optimization - Sales prediction Technologies Spring Boot • Angular • Flutter • MySQL • AWS EC2 • Docker Role Solution Design, Full-Stack Development, Deployment
Flexifit – Services Booking platform	Developed an online booking platform enabling customers to reserve beauty, wellness, and personal care services. Service providers manage: - Availability - Services - Bookings - Revenue Technologies Spring Boot • Angular • Flutter • MySQL • AWS EC2 • Docker Role Architecture, Development, Deployment
Master's Thesis	Software Quality Management Objective: Improve software quality through automated testing and continuous delivery. Technologies: Java • Selenium • Cucumber • Jenkins • JMeter Achievements: Implemented automated functional and performance testing along with a fully operational CI/CD pipeline.

Year	School	Document
2025	British Council — EnglishScore Core Skills	Score: 442 (B2 Upper-Intermediate)
2023	ETL using python: from MySQL to big query (Udemy)	Training Certificate
2024	LPI Linux Essentials (010-160) Complete Course and Exams	Training Certificate
2023	Google Analytics for Beginners (google analytic academy)	Training Certificate
2024	Complete Agile Scrum Master Certification Training (Udemy)	Training Certificate
2022	Huawei HCIA Cloud Computing (HUAWEI)	Score : 71%
DEGREES		
2022	Ecole supérieur polytechnique de Dakar (ESP)	Master in software engineering and information systems
2018	Institut supérieur d’informatique (ISI)	Bachelor degree in software engineering
2017	Institut supérieur d’informatique (ISI)	Advanced Technician's Certificate in Management Information Systems
2015	Lycée Abdoulaye SADJI	Scientific Baccalaureate
